

HEAR MUSIC DIFFERENTLY

Introducing **Vibes for Artists**

by **audible**
REALITY™

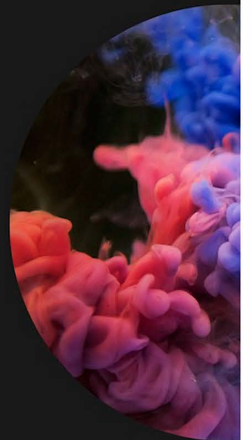

What is *Audible Reality*?

Audible Reality is a mobile app that offers music fans a groundbreaking form of personalized listening by providing them control of the song mix through “*Vibes*”. Now fans can experience unlimited versions of the same song while streaming.

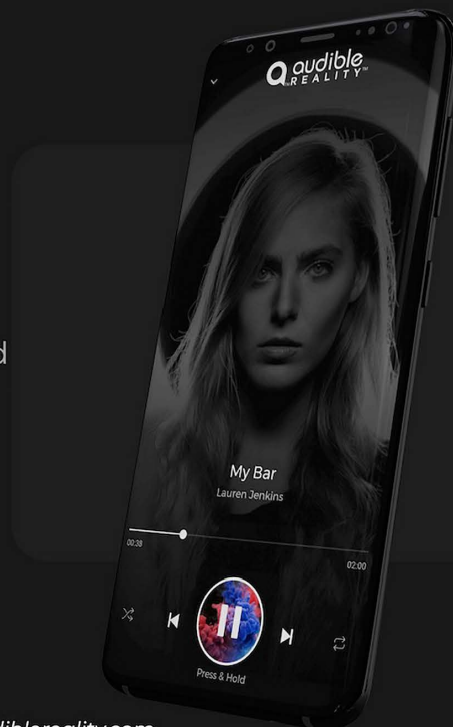

What's a **Vibe**?

A Vibe is an interactive mastering preset. Each Vibe applies a unique immersive sound mix that you create, enabling listeners to instantly hear any song in a fresh new way. For fans, browsing and selecting Vibes is as easy as selecting a filter on Instagram. They can easily purchase your Vibes in the AR Player and share them across social networks.

Which streaming services play through *Audible Reality*?

Play music from your favorite streaming services within Audible Reality Player. **Spotify** and local music are already supported with more services coming soon!

Audible Reality Pro Plug-in

How do I create and publish a Vibe?

Create Vibes with the **Audible Reality Pro** Plug-in (our immersive, interactive mastering tool for your DAW). Simply master with AR Pro and save your settings as a Vibe preset. Any Vibe you make can then be uploaded to your Artist Dashboard where you can manage and distribute Vibes to your fans through the AR Player app.

Why it's great for artists?

Artists can create and sell their own Vibes, and for the first time, control how their music is heard and experienced.

Artist Dashboard

SHARE A VIBE

How do I make money from Audible Reality?

You keep 50% of the revenue from the Vibes you sell. Engage your fans and promote your Vibes on social media with a unique link for sharing. And since Vibes drive more spins on streaming services, you'll make more money there too!

What tools are in the artist dashboard?

In the Audible Reality Dashboard you can set release dates, DSP distribution, Vibe permissions and pricing (suggested retail is \$1.99). Get detailed engagement analytics on Vibe sales and performance. See how your fans are listening to your music.

Available now on iOS and Android devices.

Get started with a free trial!

The Audible Reality Artist Ecosystem is free to join. You'll get the Audible Reality Pro DAW plugin to create Vibes for all of your music and access to the Artist Dashboard to manage and test your vibes inside Audible Reality Player.
